

# Legal Technology

BACK Consulting –leading independent technology advisors for law firms

## Don't be at the mercy of the vendors

### Legal Technology

As former members of the legal profession, we know what it takes to make your law firm move forward. We understand the challenges you face.

If you don't have a full time IT professional on your staff then you could be at the mercy of the vendor's sales pitch. You don't have to be.

We stay vendor neutral - in other words we don't sell anyone else's software. Instead we work for you, only suggesting appropriate solutions for your business.

We aim to help you in everyway possible and are here to help YOU make the decision. Once a commitment is made to a particular application we will be with you throughout the "Go-live" period to help you deal with any issues or problems that you may have.

Survival of the fittest is a theory easily applied to the legal practitioner as recent years have seen businesses grow and boom where they have invested wisely in smart technology to automate business processes and reduce the cost per transaction whilst enhancing the customer experience.

As de-regulation of parts of the legal industry looms large, most law firms with an eye on their profits are shaping up well to focus on their own IT investment and making the most out of their resources.

We examine and report to you on:

- Networks
- Document Management
- Precedent Library
- Security
- Backups and Recovery
- Case Management
- Outsourcing Options
- Digital Dictation

**Getting to grips with technology is made simple with our one day fixed price audit.**

**Call us today for a free no obligation chat with our consulting team or book your one day fixed price technology audit.**
