

Website Design and Development

BACK Consulting –leading independent technology advisors

Driving you forward

Website Design & Development

The homepage of your site is like the shop window of a bricks and mortar store. If visitors don't like your homepage they won't go any further.

It's vital that you have a website that's design is professional, clear and crisp, easy to navigate and quick to download.

We can add flash animations, interactive videos and sales presentations and even get you set up as one of the new generation of bloggers!

It is the design of a website which captures the visitor's attention and it is the content and functionality that keeps the attention. A good design reinforces your message and delivers it with more impact.

Our web designers and artists will work with you to establish a specification for your website's look and feel, functionality and navigational framework. Every company is unique and therefore each design we create will reflect the client's requirements and characteristics.

We can take care of logo's and photography and with a short brief we will produce your content for you, unless you already know what you want to say.

We provide monthly analysis of traffic and usage and can organise everything from hosting to your email accounts or even shopping cart technology with ready to go payment services for any profession or business.

Often we organise conversion of paper based catalogues and supplier information into your web store in a quick and easy way.

Whether you want a new corporate website, an interactive element or some graphic design for web publication, just talk to us.

Just contact us to get started today and we'll help build your online presence into something special.

We specialise in giving the best advice not the most lucrative for a software company.

We're independent and don't sell software for anyone.

We often help you find FREE software solutions to your business needs.
