

Find out about some of our clients

If you want to know the kinds of projects we're involved in take a glance below and see some of our flagship projects.

Gwen Malone Stenography Services

Ireland's leading provider of court reporting and stenography services have been working with GMSS in a multi phase technology renewal across the business including the implementation of an enterprise wide case management application to track all client cases, time recording, billing, document management and client case tracking. GMSS identified the need to allow their staff to work remotely and BACK were engaged to build and implement a remote access system that gave the out-based staff of GMSS access to their office systems just like they were sat at their own desk.

MD Gwen Malone said "GMSS have always been proud to put our clients at the heart of everything we do by offering excellent customer service. We can only do this by having a combination of great people and great software and support systems. We have been working with BACK Consulting for some years now and the latest development and upgrade allows us to provide faster turnaround to clients and more efficient internal working."

"BACK Consulting fully understand our needs and the insight they had into our workings has meant that we have been able to enjoy a hassle free and extremely productive partnership in driving our firm forward. The fact that BACK doesn't sell anyone's software directly has meant that we have always had high quality independent advice and worked well as a team."

The easiest route to better eBusiness solutions.
